

*note regarding wire/cable concealment ; In locations where there is inadequate access for standard wall-fishing to the wall where the wire is to be hidden , or where the wire is to be hidden in a wall that contains insulation ,vapor barriers , or any other obstructions, wire may be concealed by installer-provided paintable track molding. Installer will finish wall-fished cable exit points with a bushing or a plate . Based on the complexity of the in-wall wiring additional charges could apply and will be discussed with a client the installation . For distance longer than 10 feet special order has to be placed for proper cables , and additional labor charges may apply based on complexity of the job . All installation packages include installation into 1 room . If any additional work is requested by a client the installer will provide a quote prior to performing work.
